SUMMARY

Backend & AI Developer specializing in Laravel, PHP, MySQL, RESTful APIs, and Python-based AI solutions. Experienced in building secure backend architectures, authentication and authorization systems, third-party integrations, and scalable API workflows. Hands-on experience integrating Machine Learning, Deep Learning, and LLM-based solutions into real-world applications.

TECHNICAL SKILLS

- **Backend:** PHP, Laravel, RESTful APIs, MySQL, Eloquent ORM, Filament, Sanctum, Passport, Spatie Permission, Queues & Jobs
- **AI/ML:** Python, Machine Learning, Deep Learning, LLMs, NLP, Computer Vision, Generative AI, Model Evaluation, Data Preprocessing
- **Integrations:** Stripe, PayPal, Third-Party APIs
- **Tools:** Git, GitHub, GitLab, Postman

PROFESSIONAL EXPERIENCE & TRAINING

IX Coders – Damascus, Syria

Backend & AI Development Training | Tamkeen – Empowering the Syrian Programmer

Jul 2024 – Jan 2026

- Completed specialized training across **Backend Development and Artificial Intelligence**, with hands-on experience in Laravel, PHP, MySQL, RESTful APIs, Python, Machine Learning, Deep Learning, and LLMs.
- Built backend applications implementing authentication, validation, structured architecture, and Git-based development workflows, including a final Laravel project scoring **88/100**.
- Developed practical AI solutions involving data preprocessing, model training, evaluation, and validation using structured Machine Learning and Deep Learning workflows.
- Collaborated on team-based projects combining software engineering practices with applied AI development.

Eartech – Istanbul, Turkey

Technology & Career Bootcamp | Jan 2026

- Completed an intensive bootcamp covering **AI and Large Language Models (LLMs)**, with exposure to modern AI systems and real-world applications.
- Gained hands-on exposure to **cybersecurity fundamentals** through Hack The Box labs, alongside **cloud computing, architecture, and deployment concepts**.

Aqavia – Laravel Backend Trainer

Albuquerque, NM, USA | Jan 2026 – Aug 2026

- Delivered hands-on **Laravel Backend Development training**, covering MVC architecture, Eloquent ORM, MySQL, middleware, authentication, authorization, and RESTful API development.
- Mentored and supervised trainees throughout practical assignments and backend projects, providing technical guidance, code reviews, and troubleshooting support.
- Guided trainees in building secure, maintainable Laravel applications using clean code practices, database optimization, and Git-based version control.

- Mentored and supervised **20 trainees** through hands-on Laravel assignments and backend projects, providing code reviews and troubleshooting support.

PROJECTS

Art-Expo | Project Manager

Digital Arts Exhibition Platform (Sponsored by the Ministry of Culture) – Syria

[Website link](#)

- Led end-to-end delivery of the platform, coordinating a 3-member development team from planning through launch.
- Managed scope, requirements, priorities, and technical workflows for a platform designed to support 70+ exhibitors and 1,000+ event registrations.
- Oversaw delivery of key features including exhibitor registration, event enrollment, voting, workshops and lectures, testing, and final deployment.

All New Tech Platform (Dashboard & API System) - UK

[Website link](#)

- Developed a scalable backend using Laravel, Filament, and RESTful APIs, supporting project, service, quote request, and site-visit management.
- Implemented multilingual data handling and structured service architecture for maintainable API workflows.
- Integrated Leaflet and OpenStreetMap for location selection and automatic address detection.

Rifad Educational Platform

[Website link](#)

- Developed scalable Laravel backend features and APIs for course, training program, and multilingual content management.
- Implemented secure authentication, role-based access control (RBAC), and optimized data handling.
- Built learning workflows, performance tracking, and administrative dashboards supporting teachers and students.

AI-Powered Osteoporosis Diagnosis & Patient Management System

- Developed a secure Laravel and Filament v4 medical platform integrating AI models for osteoporosis diagnosis from radiology images.
- Built patient and radiology workflows with AI image-processing pipelines, encrypted storage, and role-based access controls.

AI-Powered Valet Parking Management System

- Developed a real-time valet management system with AI chatbot assistance, vehicle tracking, and automated workflows.
- Integrated Stripe and wallet payments, Passport authentication, and Spatie Permissions.

EDUCATION

Arab International University – Damascus, Syria

B.Sc. in Informatics & Communications Engineering (Artificial Intelligence Major)

Expected Graduation: 2027

CERTIFICATIONS & COURSES

- **Coursera (2025)** – Machine Learning & Deep Learning Specialization
- **Emirates Camp** – Artificial Intelligence Certificate
- **Additional Courses:** Java, ASP.NET Web Forms, CompTIA A+

LANGUAGES

Arabic: Native | English: Advanced

VOLUNTARY EXPERIENCE

Emirati Marshals Program – United Arab Emirates, Sharjah

Team Leader

October 2019 – May 2022

- Led and coordinated volunteer teams, supporting community initiatives, event operations, and official program activities.
