SUMMARY

Ambitious, detail-oriented Backend Developer with strong expertise in Laravel framework, scalable RESTful APIs, and multilingual database design. Skilled in architecting secure payment integrations, modular backend workflows, and production-ready systems with robust error handling. Experienced in building advanced Filament dashboards for efficient data management. Proficient in applying Machine Learning, Deep Learning, and Large Language Models (LLMs) to real-world applications, including emotion classification pipelines and digital twin systems. Recognized for problem-solving, structured architecture, and collaborative teamwork, with proven success in professional training programs and live project deployments.

EDUCATION

Arab International University – Damascus, Syria

B.Sc. in Informatics & Communications Engineering (Artificial Intelligence Major)

2022–2027 | Current GPA: 2.77

INTERNSHIP / TRAINING

IX Coders – Damascus, Syria

Backend Laravel Development Training

July 2024 – January 2025

- Completed intensive backend training under Tamkeen – Empowering the Syrian Programmer, mastering Laravel, MySQL, RESTful APIs, authentication, and Git workflows.
- Delivered a final project with secure, high-performance code, earning a score of 88/100.
- Collaborated in team-based development, applying structured architecture and robust validation flows.

Eartech – Istanbul, Turkey

Technology & Career Bootcamp

January 15, 2026 – January 30, 2026

- Completed an intensive bootcamp covering **AI and Large Language Models (LLMs)**, gaining a foundational understanding of modern AI systems and real-world use cases.
- Trained on **cybersecurity fundamentals** through hands-on labs using *Hack The Box*, focusing on practical problem-solving and security awareness.
- Developed a structured **career planning strategy**, including goal setting, personal branding, and technical career pathways.
- Gained exposure to **cloud computing concepts**, architectures, and deployment fundamentals.

AI Development Training

Sep 2025 – January 2026

- Completed intensive training under Tamkeen – Empowering the Syrian Programmer, mastering LLMs, Machine Learning, Deep Learning, Python, and data preprocessing.
- Collaborated in team-based development, applying model evaluation, validation flows, and structured AI architecture.

Aqavia – Laravel Backend Training

Albuquerque, NM 87110, US | Jan 2026 – Aug 2026

- Completed 8 months of intensive Laravel training, covering MVC architecture, Eloquent ORM, middleware, and RESTful API development.
- Built secure backend systems with authentication, authorization, and database optimization using MySQL.
- Delivered final project with clean, reusable code applying industry best practices and version control (Git).

COURSES AND TRAINING

Courses & Certifications

- **Tamkeen AI Track (2025)** – Machine Learning, Deep Learning, Generative AI (Artificial Intelligence) & LLM (Large Language Models).
- **Coursera (2025)** – Machine Learning & Deep Learning Specialization
- **Ixcoders Company Training (2024–2025)** – Backend Laravel Framework
- **Emirates Camp** – Artificial Intelligence Certificate
- **New Horizons Institute** – Frontend & Backend Development (HTML, CSS, JS, PHP, MySQL, Python)
- **Udacity** – Full Stack Development
- **Rwaq** – Frontend Development
- **Other** – CompTIA A+ | ICDL | Java | ASP.NET Web Forms

PERSONAL SKILLS

Technical skills

- **Backend Development:** Laravel (advanced), PHP, MySQL, RESTful APIs, Authentication (Sanctum, Passport), Authorization (Spatie Permission), Filament Dashboard, Modular API Architecture, Third-Party Integrations, Secure Payment Systems, Multilingual Database Design (Spatie Translatable), Error Handling & Logging (Monolog), Queue & Job Management.
- **AI & Machine Learning:** Machine Learning, Deep Learning, Generative AI, Large Language Models (LLMs), Audio Processing (Speech Recognition, Emotion Detection, Voice Classification), Time Series Analysis (Forecasting, Anomaly Detection, Sequential Modeling), NLP (Text Classification, Sentiment Analysis), Computer Vision, Model Deployment, Data Preprocessing & Feature Engineering, Confusion Matrix & Metrics Visualization, Digital Twin Systems, Prompt Engineering.
- **Frontend Tools:** HTML, CSS, JavaScript, Bootstrap, Blade
- **DevOps & Tools:** Git, GitHub, GitLab, Postman, Spatie Libraries, Stripe/PayPal Integration
- **Other:** Java, Python, ASP.NET, ICDL, CompTIA

Soft Skills

- **Leadership:** Proven ability to guide teams effectively, demonstrated through volunteer leadership and technical mentoring.
- **Teamwork:** Collaborative mindset with experience working in diverse groups to deliver complex projects successfully.
- **Communication:** Strong written and verbal communication skills in both English and Arabic, enabling clear documentation and cross-functional collaboration.

- **Problem-Solving:** Analytical thinker with a structured approach to identifying issues, troubleshooting, and implementing efficient solutions.
- **Time Management:** Skilled at prioritizing tasks and coordinating multiple responsibilities under tight deadlines.
- **Adaptability:** Quick learner who thrives in dynamic environments, embracing new technologies and methodologies with ease.

LANGUAGES

- Arabic: Native
- English: Advanced

PROJECTS

All New Tech Platform (Dashboard & API System) - UK

[Website link](#) | [Dashboard link](#)

- Developed a scalable backend system using Laravel and Filament with a full admin dashboard and RESTful APIs.
- Implemented project and service management with multilingual support (JSON-based translations).
- Built structured APIs for projects, services, quote requests, and site visits using clean service architecture.
- Integrated interactive map-based location selection (Leaflet + OpenStreetMap) with automatic address detection.
- Enhanced performance and user experience through organized dashboards, reusable components, and optimized data handling.

Rifad Educational Platform

[Website link](#) [Dashboard link](#)

- Developed core backend features for an educational platform empowering teachers and students across Syria.
- Built structured training program modules, course management flows, and multilingual content delivery.
- Implemented secure authentication, role-based access, and optimized data handling for high-traffic educational operations.
- Enhanced user experience through organized dashboards, performance tracking, and scalable API architecture.
- Integrated flexible learning paths supporting teachers' professional development and student learning journeys.

AI-Powered Blockchain Trading Platform

- Designed a secure trading platform using Laravel, AI (Artificial Intelligence), and Blockchain.
- Implemented risk assessment models with Machine Learning (ML) for automated investment decisions.
- Integrated Stripe payments, Passport authentication, and Spatie role management.

AI-Powered Osteoporosis Diagnosis & Patient Management System

- Developed a secure medical platform using Laravel, Filament v4, and integrated AI models for automated osteoporosis diagnosis from radiology images.
- Built complete patient workflows, including medical history, radiology analysis, and AI-driven image processing pipelines.
- Implemented encrypted storage, doctor-level permissions, and strict access control to protect sensitive medical data.

AI-Powered Valet Parking Management System

- Developed real-time valet coordination with AI chatbot assistance.
- Optimized customer experience through vehicle tracking and automated decision-making.
- Integrated Stripe & wallet payments with Passport authentication and Spatie Permissions.

E-Commerce System APIs

- Built scalable APIs with Laravel Sanctum authentication and Spike Library Bank integration.
- Implemented secure user management, product categorization, and order processing.
- Optimized database performance, image storage, and error handling.

Course Management System

- Designed CRUD operations for courses and projects with Laravel + MySQL.
- Implemented PayPal & Visa payment integration and role-based access control.
- Enhanced usability with Blade templates and structured project tracking.

VOLUNTARY EXPERIENCE

Emirati Marshals Program – United Arab Emirates, Sharjah

Team Leader

October 2019 – May 2022

- Led social service initiatives as part of a national volunteer program focused on community engagement and public support.
- Coordinated team activities, ensured smooth event operations, and represented the program in official capacities.
- Demonstrated leadership, responsibility, and commitment across 2 years and 8 months of continuous service.
